## Local Website Design

These folks had very limited budgets and didn't want much of their sites. They had no logo, no information so we put a business card style site together for next to nothing.

These folks used the internet strictly for lead generation. They were able to get leads coming in quite rapidly using our marketing strategies.

Although the site does get local search traffic, the main goal was to get paint estimates.

## Ebook Selling Websites

This website template designed to fit a long sales letter format.

After updating the graphics, and other parts of the site, it's sales increased by over 50%.

Dear Cat Owner,

It hurts to see your precious cat destroying your home. I know the feeling myself. When you first started having this problem, I bet you even considered **(even if only for a second,)** getting rid of your cat, but quickly return to the pain of losing their companionship.

We humans like our homes free of cat residue and scratch marks. We pride ourselves on a nice home for ourselves and any visitors we might have come over for a visit. Other people have cats that behave... *right?*

This graphic template was developed quite affordably for a website that sells a book teaching people how to sell their car thru classified ads.

Below the logo, it states 'Canadian owned and operated' and 'Quality preserved toys from the 70s, 80s, 90s and now!'. A shipping logo for 'Canada Post' is also present.

The main content area is titled 'Fast Food & Cereal Toys' and shows a list of products. The products are displayed in a table with columns for product images, descriptions, prices, and 'Buy Now' buttons.
